## POWERFUL RESOURCES FOR VIDEO MARKETS IN FRANCE, ITALY & ALGERIA

Ku-band Transalpine Downlink Coverage

Ku-band Europe Downlink Coverage

Located at 5° West, EUTELSAT 5 West B addresses predominantly French, Italian and Algerian broadcast markets, delivering around 300 TV channels, with over 150 in HD and 2 in UHD.

Reaching millions of viewers across France, Italy, and Algeria, EUTELSAT 5 West B distributes Digital Terrestrial Television (DTT) signals to head-end transmitters.

In France, EUTELSAT 5 West B plays a key role:

- Providing primary transport of all DTT channels to terrestrial transmitters, for redistribution via the terrestrial network
- Broadcasting all DTT channels in HD from the free-to-view FRANSAT platform, via Direct-to-Home (DTH) reception, to French households.
- Broadcasting the two new UHD channels from France Télévisions, in the world's first deployment of the DVB-SIS transmission standard, to feed both terrestrial transmitters and DTH reception via FRANSAT, from a single content delivery source.

Built by Airbus Defence and Space and Northrop Grumman Innovation Systems (NGIS), EUTELSAT 5 West B also hosts the GEO-3 payload of the European Geostationary Navigation Overlay System (EGNOS), designed to improve the performance of global navigation satellite systems in Europe.
